## Response to Arguments

Applicant's arguments on pages 20-24 of the response filed 20 September 2004, with respect to claims 1-6 and 17, 18, and 22-29 have been fully considered and are persuasive. The rejections of these claims have been withdrawn. The objections to claims 6-16, 18-21, and 26-28 have also been withdrawn.

## Examiner's Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Noting applicant's remarks on pages 20-24 of the response filed 20 September 2004, and referring to claims 1-29, the prior art searched and of record neither anticipates nor suggests in the claimed combinations, determining pixel by pixel whether all the gradation data for each pixel of the image in regard to the color components satisfy respective unwanted gradation conditions and converting into a predetermined gradation, the gradation data of the plurality of color components of the pixel having gradation data that have been determined to satisfy the unwanted gradation conditions, said predetermined gradation being set with respect to each one of the color components.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 09/665,212

Art Unit: 2626

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tsuji (US 6122441 A) discloses independently performing a background color level control to each of the color component signals.

Shirasawa et al (US 5689590 A) disclose converting the densities concerning color components in the color-image data for each pixel so as to change the densities concerning respective color components for the pixel into densities corresponding to white ones when all of the densities concerning respective color components for the pixel are lower than a predetermined threshold density value.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott A Rogers whose telephone number is 703-305-4726. The examiner can normally be reached on Monday & Wednesday 6:00am-6:00pm and Tuesday & Thursday 6:00am-2:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kimberly Williams can be reached on 305-4863.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to Customer Service at 703-306-0377. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
